EDUCATION

Babu Banarasi Das University, Lucknow

2021 – 2025

B.Tech - Computer Science and Engineering - CGPA: 7.7

Lucknow, Uttar Pradesh

Chandra Public School, Mau, UP

2019 – 2020

Intermediate - Percentage: 83.3

Chandra Public School, Mau, UP

2017 – 2018

High School - Percentage: 78.8

COURSEWORK / SKILLS

- Data Structure and Algorithms (DSA)
- Database Management System (DBMS)
- Oops Concepts
- Software Engineering

EXPERIENCE

Intern at Revspire 

Aug 2024 - feb 2025

Role -Intern Software Engineer

Bangalore

- Developed and maintained the responsive web applications using React.js, enhancing user experience across devices; ensured a seamless UI/UX that increased daily active users by 1,000 within the first month of launch.
- Automated data flow between applications by implementing RESTful APIs through Express.js and Node.js; this initiative is now employed by over 10 developers, facilitating faster deployment and updates across projects.
- Optimized application performance by implementing best coding practices and debugging frontend issues, reducing load times and improving overall efficiency.

PROJECTS

Food Hub  | [React JS, Redux Toolkit, Swiggy API, Tailwind CSS](#)

2025

- Developed a food ordering website similar to Swiggy, utilizing the Swiggy API for live food data.
- Implemented with React.js for frontend interactivity, Redux Toolkit for efficient state management, and Tailwind CSS for modern styling.
- Utilized React Router DOM for seamless client-side routing, ensuring a smooth user experience.

TubeForge  | [React.js, Express.js, MongoDB, Tailwind CSS, JWT, Google OAuth2, Multer, FFmpeg](#) **2026**

- Developed a full-stack YouTube content management platform using React.js, Node.js, Express.js, and MongoDB with secure Google OAuth2 authentication.
- Integrated YouTube Data API to enable video uploads, channel management, and analytics features such as views, subscribers, and video statistics.
- Built responsive and dynamic frontend dashboards using React.js and Tailwind CSS with reusable UI components and protected routes using JWT authentication.
- Implemented media upload and processing functionality using Multer, FFmpeg, and Sharp for handling videos and thumbnail optimization.

Code Camp  | [React JS, JavaScript, MongoDB, Express, Node JS, JWT, IDE - VS Code](#)

2026

- Developed an interactive coding platform using React and Judge0 API to provide real-time code compilation and execution for various programming challenges.
- Implemented secure user authentication with JWT and managed user sessions, enabling personalized problem-solving experiences and tracking progress in the platform.
- Built a scalable backend with Node.js, Express, and MongoDB, integrating Redux for state management and leveraging Postman for API testing and debugging during development.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL , C, C++

Technologies/Frameworks: HTML5, CSS3, React, MongoDB, PostgreSQL, Express, Javascript, NodeJS, Tailwind CSS

Developer Tools: VS Code, IntelliJ,
